

INQUIRO 1.0 – RELEASE NOTES

Released January 30, 2015

SUMMARY

This release provides:

- 3 new features,
- 14 enhancements,
- 9 bug fixes.

NEW FEATURES

- **Manage Dictionary**
 - Dedicated screen
 - Add values to a dictionary
 - Limitations
 - Doesn't allow dictionary creation
 - Doesn't allow value removal from a dictionary
- **Change container type**
 - Upload folder hierarchy and related files via FTP
 - From the GUI, click on a tree view item → « Change container type »
 - You are then prompted to add the required information to match the new type
 - Limitations
 - Only a folder can be changed
 - Operation cannot be cancelled
- **Search over aggregated metadata**
 - You add a DNA biomarker to file below an Indication
 - You then search for the biomarker
 - You will get result for parent Program, Project, Platform and Indication
 - Can work upward and downward

ENHANCEMENTS

ID	Area	Description	Comment
DARK-11	Dictionary	Sort dico values in edit file metadata and other dico components	
DARK-42	FTP	FTP connector Performance enhancement	
DARK-14	FTP	FTP connector identifies the connected user	When you upload files through FTP this no longer a generic account that will be used. Now files uploaded will be lined to the user who uploaded them.
DARK-111	Navigation / UX	Design Factors - modify dose component	
DARK-23	Security	Firewall rules on the servers to prevent connections from outside	
DARK-22	Security	Database authentication to prevent unwanted connections	
DARK-21	Security	HTTPS to avoid traffic sniffing	
DARK-43	Search	Indexing performance enhancement	Previously You had to wait up to 5 minutes to find a file or container that was just added to the application. Now we are near real time.
DARK-110	Search	Hiting "enter" launch the search	
DARK-105	Search	Indexing crashes when a database server go down	
DARK-97	Search	Utilities to restart indexing from a specific timestamp	We created an utility that allow the indexing to restart indexing from a timestamp. So in case of failure we don't need to make a full indexing
DARK-50	Search	Use '*' as a wildcard in search input field	You can use * as a wildcard both at the beginning or at the end of a search
DARK-49	Search	Offer the user a chance to relaunch search with a wildcard	Default search is exact match. Now on top of the search result list you can click to relaunch the search with a wild card at the end of the search string
DARK-39	Search	Search over aggregated data	If you search for a specific DNA biomarker you will now get in search result project which childs match the searched biomarker

BUG FIXES

ID	Area	Description	Comment
DARK-10	Export	Export with metadata csv files now only show columns related to their type.	
DARK-73	FTP	Cannot recreate file delete through FTP	
DARK-98	Navigation / UX	Wizard - "Next step" greyed out	
DARK-69	Navigation / UX	Tree View loading performance enhancement	
DARK-64	Navigation / UX	Refresh TreeView lead to an internal server error	
DARK-162	Search	Recent search is not tracked any more	
DARK-8	Search	Number of hit in search result not consistent	Most of the time the number of hits was 0
DARK-151	Upload	Uploading files with special characters fails	
DARK-144	Upload	Upload failure rate through GUI below 1%
