

INQUIRO 1.2 – RELEASE NOTES

Released April 10, 2015

SUMMARY

This release provides:

- 2 new features,
- 1 Enhancement,
- 19 bug fixes.

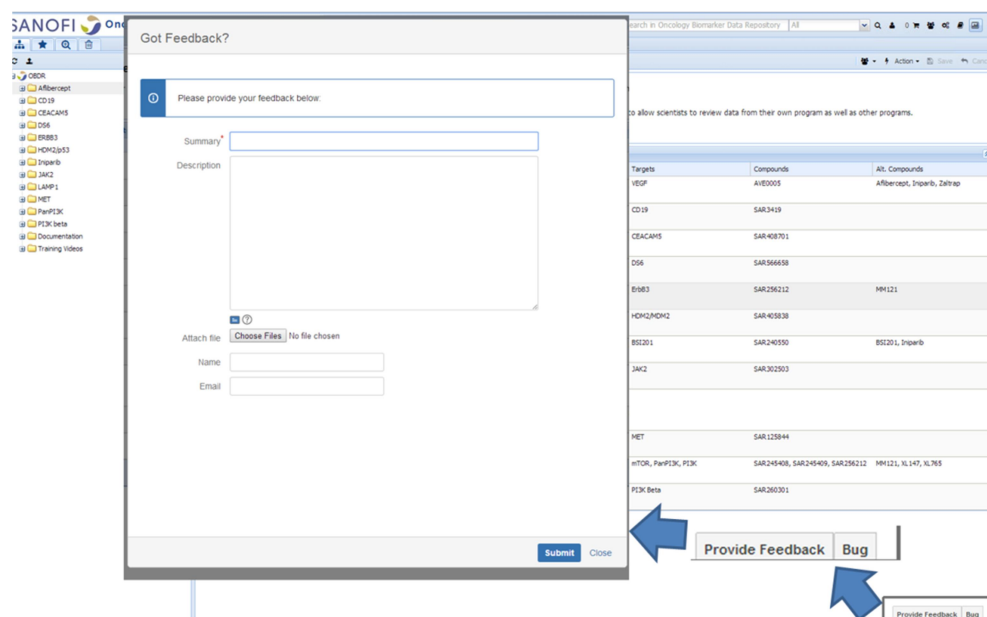

NEW FEATURES

- **Issue collector**

The issue collector allows feedback form into your Inquiro web page. This form is accessed by clicking a footer tab exposed along the bottom of pages.

When used, this trigger tab submits the resulting JIRA feedback form, an issue is conveniently created in JIRA.

All users do not require a user account in JIRA to use the JIRA feedback form but application administrator will be able to follow up.

- 1) Click on feedback or Bug
- 2) Fill the form and you are done

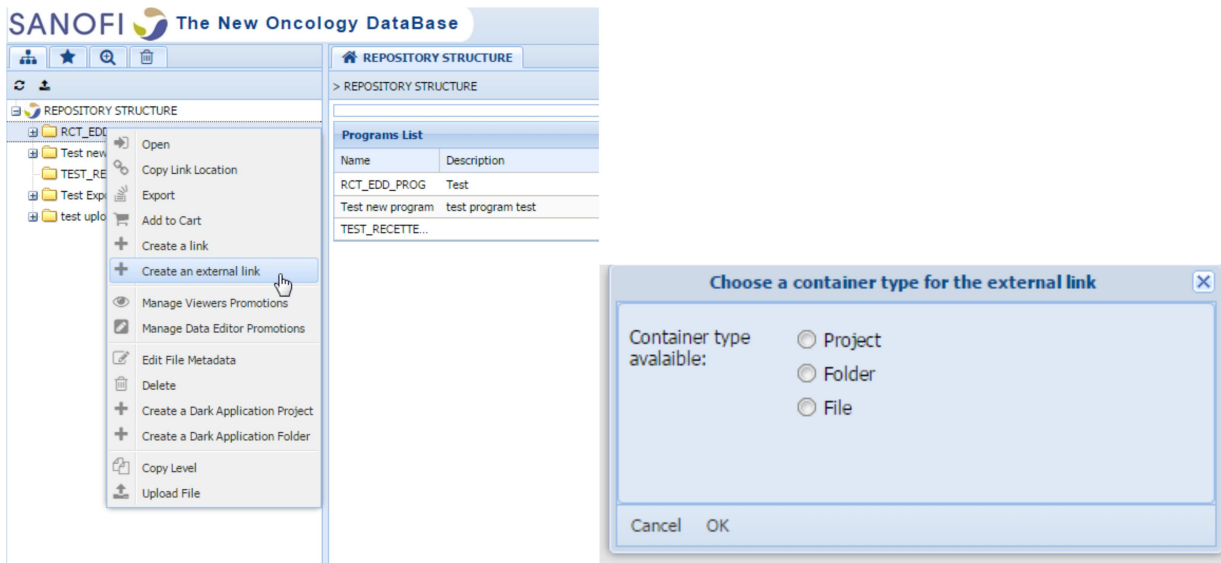

- **Link to internal or external resources**

From now, you can create a link to a resource out of Inquiro. This resource can take any of the metadata scheme. For example :

contact@dextr.io | www.dextr.io | +33 981 777 336

DEXSTR SA - 195 Route d'Espagne - BP 13669 - 31036 Toulouse Cedex 1, France

SA AU CAPITAL DE 100.000 EUROS - SIRET: 8 05 2 64 8 68 0 00 11 - RCS TOULOUSE - TVA FR 13 805 264 868

When creating a link to a resource inside or outside the application, you can select which metadata schema (or container type) this link will use.

This will allow the creation of a Program link or project link.

These items have the same indexation and aggregation rules as any internal resource.

ENHANCEMENTS

ID	Area	Description	Comment
DARK-317	Web	Remove map reduce for stats	This is about increasing the performance of the stat generation. Using aggregation instead of map reduce gain about 10 times

BUG FIXES
