

INQUIRO 1.3 – RELEASE NOTES

Released July 1st , 2015

SUMMARY

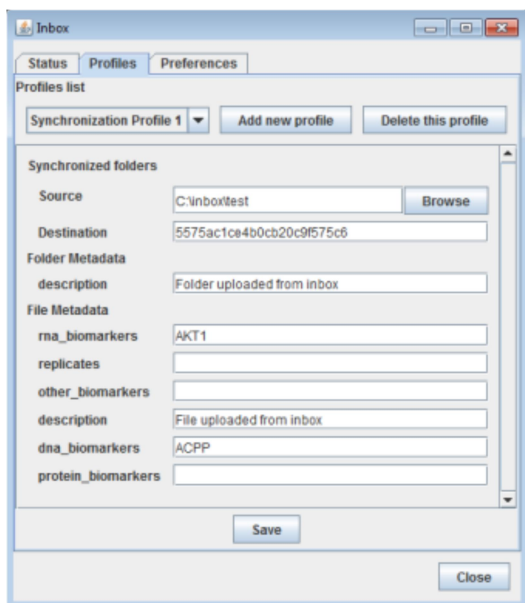

This release provides:

- 2 new features,
- 8 Enhancement,
- 56 bug fixes.

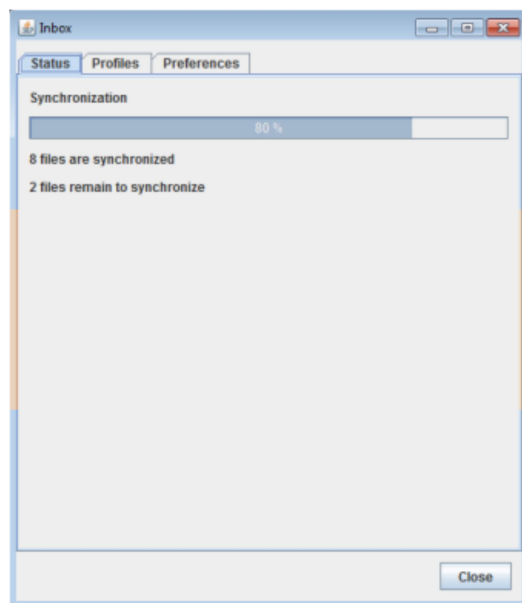

NEW FEATURES

- **INBox**

INBox is a client that can run on Windows and Linux. The installation guide is described on the attached document. The goal is to push data from a client computer to the Inquiro server.

Manage synchronization profiles

Follow synchronization status

- **Angular New interface in read only**

The new Angular web interface is giving user a new navigation experience. Following the evolution of the web, we now use more functionality of modern browsers like tabs. Also this new interface brings more readability, speed and interactive messages to users.

ENHANCEMENTS (TOTAL :8, SAMPLE OF MAIN ONE BELOW)

ID	Area	Description	Comment
DARK-234	Web	Multiple dictionaries for a single field	A single field in Inquiro can take multiple value. For example a field call biomarker could use values from dna_biomarker plus rna_biomarker
DARK-147	Web	Make Dictionary change dynamic	A change in the dictionary can be reflected immediately in Inquiro
DARK-532	Web	Autocomplete on dictionaries	On edit of container, there is now autocompletion on all fields.
DARK-415	Web	Immutable URL improvement	Any url exported until now will still work whatever change on the server (url, server name, Inquiro version ...)
DARK-293	Web	Performance of the dictionary browser (large dictionaries)	For large dictionaries (like gene with 40k+ values) the data is now loaded in a lazy manner so that the user never waits. Together with autocompletion, looking a term in a large dictionary is now quick and easy
DARK-107	Api	Performance of the tree (API call improvement)	

BUG FIXES (TOTAL : 56, SAMPLE OF MAIN ONE BELOW)

ID	Area	Description	Comment
DARK-490	Web	Facet search is sometime empty	
DARK-477	Web	Error 413: Entity too large	
DARK-439	Web	New version uploader name is wrong	
DARK-425	Web	Aggregation is broken	
DARK-417	Web	Export is limited to 100Mb, error otherwise	
DARK-557	Web	Wrong file count while listing/exporting	
DARK-544	Web	Remove user end with error 500	
DARK-529	Web	During a drop of bin elements, gridFS is not cleaned	
DARK-489	Web	Wrong log create for search engine usage	

DARK-438	Web	Download an old file version always point to the lastest
DARK-526	Web	Create indication ends with internal error
DARK-575	Web	Delete a profile ends with an error 500
